Contents Volume 162

1 Editorial: Logistics: From theory to application (ECCO XIV)
S. Martello and E. Pesch
4 Facility location models for distribution system design
A. Klose and A. Drexl
30 Greedy random adaptive memory programming search for the capacitated clustering problem
S. Ahmadi and I.H. Osman
45 A half-product based approximation scheme for agreeably weighted completion time variance
J. Cheng and W. Kubiak
55 Minimal multicut and maximal integer multiflow: A survey
M.-C. Costa, L. Létocart and F. Roupin
70 On finding dissimilar Pareto-optimal paths
P. Dell'Olmo, M. Gentili and A. Scozzari
83 Performance modeling and analysis of integrated logistic chains: An analytic framework
M. Dong and F.F. Chen
99 Tabu search algorithms for job-shop problems with a single transport robot
J. Hurink and S. Knust
112 Single machine group scheduling with resource dependent setup and processing times
A. Janiak, M.Y. Kovalyov and M.-C. Portmann
122 Dual variable based fathoming in dynamic programs for column generation
M.E. Lübbecke
126 Heuristic algorithms for single and multiple depot vehicle routing problems with pickups and deliveries
G. Nagy and S. Salhi
142 A heuristic approach for the Travelling Purchaser Problem
J. Riera-Ledesma and J.J. Salazar-González
153 An assembly-type supply chain system controlled by kanbans under a just-in-time delivery policy
S. Wang and B.R. Sarker
173 Scheduling preemptive open shops to minimize total tardiness
C.-F. Liaw
184 Minimizing number of tardy jobs on a batch processing machine with incompatible job families
F. Jolai
191 Distribution centre location modelling for differential sales tax structure
B. Avittathur, J. Shah and O.K. Gupta
206 Local search for the probabilistic traveling salesman problem: Correction to the 2-p-opt and 1-shift algorithms
L. Bianchi, J. Knowles and N. Bowler
220 A two-phase hybrid metaheuristic for the vehicle routing problem with time windows
J. Homberger and H. Gehring

doi:10.1016/S0377-2217(04)00682-4

239 Using system dynamics models with litigation audiences
S. Howick
251 Benefit sharing in holding situations
S. Tijs, A. Meca and M.A. López
270 Computing the nucleolus of cyclic permutation games
T. Solymosi, T.E.S. Raghavan and S. Tijs
281 A multi-start dynasearch algorithm for the time dependent single-machine total weighted tardiness scheduling problem
E. Angel and E. Bampis
291 Approximation algorithms for k-unit cyclic solutions in robotic cells
H.N. Geismar, M. Dawande and C. Sriskandarajah
310 Production planning with approved vendor matrices for a hard-disk drive manufacturer
L.H. Lee, E.P. Chew and T.S. Ng
325 Managing inventories in a two-echelon dual-channel supply chain
W.K. Chiang and G.E. Monahan
342 Inventory control based on advanced probability theory, an application
M. Krever, S. Wunderink, R. Dekker and B. Schorr
359 Joint determination of production run length and number of standbys in a deteriorating production process
C.-C. Hsieh and Z.-Z. Lee
372 Optimal design of unreliable production–inventory systems with variable production rate
B.C. Giri, W.Y. Yun and T. Dohi
387 An algorithm based on discrete response regression models suitable to correct the bias of non-response in surveys with several capture tries
C. Anido, C. Rivero and T. Valdés
403 Estimating the steady-state mean from short transient simulations
P.A. Sheth-Voss, T.R. Willemain and J. Haddock
418 Identification of a small reliable and efficient set of consistent scenarios
O. Tietje
433 Correlation and the time interval in multiple regression models
R. Jea, J.-L. Lin and C.-T. Su
442 Generalized evaluation in decision analysis
M. Danielson
450 Two axiomatic approaches to decision making using possibility theory
P.H. Giang and P.P. Shenoy
468 Some issues in measuring and reporting solution quality of interactive multiple objective programming procedures
M. Sun
484 A regression study of the number of efficient extreme points in multiple objective linear programming
R.E. Steuer and C.A. Piercy
497 Some geometrical aspects of the efficient line in vector optimization
M.E. Ballvé and P. Jiménez Guerra
503 An approach for solving nonlinear multi-objective separable discrete optimization problem with one constraint
Y. Isada, R.J.W. James and Y. Nakagawa
514 Linear programming approaches for multicategory support vector machines
Y. Yajima

532 Ensemble strategies for a medical diagnostic decision support system: A breast cancer diagnosis application
D. West, P. Mangiameli, R. Rampal and V. West
552 Optimal software testing in the setting of controlled Markov chains
K.-Y. Cai, Y.-C. Li and W.-Y. Ning

581 Editorial: Decision-aid to improve organisational performance
A. Guitouni
584 A preference-based approach to spanning trees and shortest paths problems
P. Perny and O. Spanjaard
602 An interactive method for the optimal selection problem with two decision makers
F. Ben Abdelaziz and S. Krichen
610 Decision-maker's preferences modeling in the stochastic goal programming
B. Aouni, F. Ben Abdelaziz and J.-M. Martel
619 Stochastic programming with fuzzy linear partial information on probability distribution
F. Ben Abdelaziz and H. Masri
630 SARPlan: A decision support system for Canadian Search and Rescue Operations
I. Abi-Zeid and J.R. Frost
654 Prototyping an intelligent decision support system for improving urban infrastructures management
A. Quintero, D. Konaré and S. Pierre
673 A non-additive decision-aid for venture capitalists' investment decisions
A. Zacharakis and D.A. Shepherd
690 A market-driven transfer price for distributed products using mathematical programming
S.Y. Lakhal, S. H'Mida and U. Venkatadri
700 Branch-and-cut algorithms for the undirected *m*-Peripatetic Salesman Problem
É. Duchenne, G. Laporte and F. Semet
713 Models and methods for standardization problems
W. Domschke and B. Wagner
727 Single machine scheduling with resource dependent release times and processing times
X. Wang and T.C.E. Cheng
740 On scheduling around large restrictive common due windows
D. Biskup and M. Feldmann
762 Supply chain coordination with downstream operating costs: Coordination and investment to improve downstream operating efficiency
R.K. Cho and Y. Gerchak
773 Economic order quantity models for ameliorating/deteriorating items under inflation and time discounting
I. Moon, B.C. Giri and B. Ko
786 On multi-item inventory
D.K. Bhattacharya
792 Inventory models with inventory-level-dependent demand: A comprehensive review and unifying theory
T.L. Urban
805 The impact of unknown demand parameters on (*R*,*S*)-inventory control performance
L.W.G. Strijbosch and J.J.A. Moors
816 Reducing incremental costs associated with the delegation of incentive contracting decisions: An analysis of planning and control decisions in a manufacturing setting in the presence of moral hazard
R. Natarajan, K. Sethuraman and K. Surysekar

839 Allocation of catalogs to collective customers based on semiparametric response models
B. Baumgartner and H. Hruschka
850 Profitability of a sample of Portuguese bank branches and its decomposition into technical and allocative components
M.C.A. Silva Portela and E. Thanassoulis
867 Contents Volume 162
